

To Whom It May Concern

I am writing to confirm that Anushka Manoj has tested and evaluated a prototype designed for the detection of diabetic retinopathy using retinal fundus images.

The prototype was tested on fundus images and not directly on patients. The evaluation was conducted under my supervision and focused on assessing the system's ability to analyse retinal images and detect different stages of diabetic retinopathy.

Based on the evaluation, the prototype demonstrated promising performance in the preliminary identification and classification of diabetic retinopathy severity. The diagnostic algorithms and image processing methods produced outputs consistent with commonly observed clinical patterns.

Sincerely,

Dr. RAMESH VENKATESH
M.S., FVRF FMRF
Vitreous Retina Consultant
